

IT Manager:in (m,f,d)

Permanent position, full-time (40h), Münster

As an IT Manager at E-Lyte, you will have the opportunity to contribute your ideas and experience to the development of our IT and to actively implement them. It is important to us that you share our vision for a modern and digital company and that you enjoy working in a dynamic start-up environment.

Additional benefits at E-Lyte:

- We offer you a company pension plan
- We offer a performance-related bonus in addition to your salary
- We promote further training and development opportunities
- Employee events at regular intervals are important to us.
- We are open to flexible working hours
- With us you have very good chances for advancement in a short period of time

Your tasks:

- Building up our IT area by designing our IT landscape and processes and further developing our existing infrastructure
- Contact person and knowledge broker for our team members
- Collaboration on cross-departmental projects with a focus on digitalization
- Monitoring, administration and maintenance of our network BackUp environment (Synology and Windows Server)
- Administrative management of all Office 365 services
- Diagnosis and elimination of technical problems with software and hardware applications
- Ongoing monitoring and error analysis as well as continuous optimization of the IT infrastructure
- Preparation of documentation
- Accompanying certifications and carrying out necessary activities (e.g. TISAX)

Your profile:

- Completed vocational training/studies in the field of IT or relevant professional experience in the IT environment
- Sound knowledge of Microsoft Active Directory and SCCM or similar current deployment systems
- High IT affinity and confident in the use of common Microsoft operating systems
- Knowledge of the Linux environment
- Reliability and solution-oriented way of thinking
- Structured work, curiosity, openness and flexibility for new topics

- Very good knowledge of German and English

Additionally advantageous

- Experience in TISAX
- Experience in setting up, managing and further developing a server environment

This is E-Lyte Innovations

E-Lyte manufactures and develops electrolyte solutions for advanced energy storage systems. If you already know what it's all about, optimal!

Otherwise, here's a little digression for a better understanding:

How can we be mobile without harming the climate? How can energy storage systems such as the lithium-ion battery become more efficient? To ensure that the energy turnaround not only remains a hot topic in the media, but also becomes technically possible, E-Lyte is working to improve and enable modern and innovative energy storage systems by developing and producing customized electrolytes. There is no such thing as a universally suitable electrolyte solution. Therefore, it is our mission to produce the perfectly fitting electrolyte for every energy storage system!

This is how you apply to us

Write us who you are, what motivates you and why E-Lyte Innovations is exciting for you. In addition, we need a current CV (resume), your desired start date, and your salary requirements. Please send everything to recruitment@e-lyte.de.

We are looking forward to your application!
