

Key Account Manager:in Sales (m,w,d)

Permanent position, full time (40h), Münster or Kaiserslautern

As a Key Account Manager at E-Lyte, you should be ready to actively shape the future of the energy industry. We are looking for ambitious and driven people who want to orientate, adapt and grow with us in the rapidly developing battery industry. You will be responsible for building and expanding our business relationships with existing customers, as well as acquiring new customers for our company.

Additional Benefits at E-Lyte:

- We offer you a company pension plan
- We offer a success-oriented bonus in addition to your salary
- We promote further training and development wishes
- Employee events at regular intervals are important to us.
- We are open to flexible working hours
- With us you have very good chances for advancement in a short period of time

Your tasks:

- Expansion of business with existing customers and development of new customers within the framework of structured market development
- Development of new market strategies to open up new market segments
- Development of new strategies for optimized support of our key customers
- You identify and contact new potential customers and arouse their interest in our products
- You advise our customers on the planning of their R&D projects and the purchase of our services
- You are responsible for building a sales pipeline and identifying new leads, e.g. by attending trade shows and conferences and through market analysis or tools such as LinkedIn's Sales Navigator
- Performing market and competitive analysis and identifying regional and global trends
- You are always close to the customer by networking and meeting in presence
- You independently conduct contract negotiations and successfully close contracts
- You always have your sales goals in mind and manage to support the customer holistically through after-sales activities in the long term
- You conduct customer workshops and represent E-Lyte as a speaker at conferences and trade shows

Your profile:

- Completed studies in industrial chemistry, industrial engineering, chemistry or chemical engineering is an advantage or you have completed studies in business administration and have already gained several years of professional experience in technical sales of chemical products
- At best, you have gained first experiences in the field of modern battery technologies and battery components
- You have a high technical and technological understanding, as well as a fast comprehension and at best already first networking in the battery industry
- Strong communication and presentation skills
- Very good German and English language skills are required

This is E-Lyte Innovations

E-Lyte manufactures and develops electrolyte solutions for advanced energy storage systems. If you already know what it's all about, optimal!

Otherwise, here's a little digression for a better understanding:

How can we be mobile without harming the climate? How can energy storage systems such as the lithium-ion battery become more efficient? To ensure that the energy turnaround not only remains a hot topic in the media, but also becomes technically possible, E-Lyte is working to improve and enable modern and innovative energy storage systems by developing and producing customized electrolytes. There is no such thing as a universally suitable electrolyte solution. Therefore, it is our mission to produce the perfectly fitting electrolyte for every energy storage system!

This is how you apply to us

Write us who you are, what motivates you and why E-Lyte Innovations is exciting for you. In addition, we need a current CV (resume), your desired start date, and your salary requirements. Please send everything to recruitment@e-lyte.de.

We are looking forward to your application!
